OXFORD ZAMBIA CATALOGUE

Oxford University Press Zambia is proud to present our resources, uniquely structured to offer a complete classroom solution that addresses teacher and learner needs from Grade 1 to 12. Oxford's *Let's Do* series for primary level and *Progress in* for secondary are approved by the Ministry of Education's Curriculum Development Centre for use in Zambian schools. They are written by subject specialists and include activities that engage learners in their own learning process in a practical way and focus on learning through doing. In addition, we have included information on learner books and teacher guides translated into local languages, and our Chitonga readers for Grades 1 to 4. You will also find additional resources aimed at teachers and learners.

*Publishing Director
Oxford University Press
Southern Africa*

ANSON BANDA

*Country Coordinator
Oxford University Press
Southern Africa*

Anson Banda has taught at secondary school level and became Senior Curriculum Specialist and Head of the Faculty of Languages: English for the Curriculum Development Centre of the Ministry of Education. He has authored several course books and supplementary materials, trained book evaluators, and facilitated training for the Life Skills, HIV and AIDS, Gender Issues, Sexuality Education Programmes, and the Primary Reading Programme.

New Progressive

PRIMARY ENGLISH

BACK BY
POPULAR DEMAND!

New Progressive Primary English is a trusted and dynamic series for Grades 1–4 that equips learners with English skills as early as possible. Written by literacy experts, *New Progressive Primary English* has been developed so that English is learnt in a communicative way, according to relevant themes. Vocabulary is developed in an integrated way with activities suitable for this age group. Development of phonics and language structures are carefully planned to progress from grade to grade.

KEY FEATURES OF THE LEARNER'S BOOK

- Practical and written activities encourage learner-focused teaching and learning, and cater for all ability groups.
- Full-colour illustrations and photos are carefully selected to develop vocabulary and skills.
- Term revisions help teachers to revise, consolidate and assess.

KEY FEATURES OF THE TEACHER'S GUIDE

- A detailed scope and sequence plan shows full coverage of the skills and phonics per unit.
- Clear guidance on time allocation ensures coverage in three terms.
- Step-by-step teaching guidelines, as well as practical suggestions for homework and continuous assessment, save teachers preparation time.
- A resource section includes worksheets and simple assessment tools suitable for the level.

Use your mobile 'phone to scan the QR codes to see the contents list and a few pages from each of the learner's books and teacher's guides.

Note: These are extracts of a few selected pages, not the entire books.

Oxford Let's do is a learner-centred series for Grades 1 to 7 with a step-by-step approach that ensures full syllabus coverage. Written by experts at this level, activities engage learners in their own learning process in a practical way and focus on learning through doing.

KEY FEATURES OF THE LEARNER'S BOOK

- Full-colour illustrations and high-quality photos capture learners' attention and are used to teach the knowledge, skills and values effectively.
- Practical and written activities encourage learner-focused teaching and learning.
- Simple revision and assessment exercises at the end of units help teachers to revise, consolidate and assess.

KEY FEATURES OF THE TEACHER'S GUIDE

- A copy of the syllabus includes Learner's Book page references.
- Practical and step-by-step teaching guidelines save teachers preparation time.
- A resource section includes worksheets and simple assessment tools suitable for the subject and grade.

TOPIC 2	Governance	TOPIC 2						
<table border="1"> <thead> <tr> <th>Sub-topics</th> <th>Specific Outcomes</th> </tr> </thead> <tbody> <tr> <td>1 Sex and gender roles</td> <td> <ul style="list-style-type: none"> • Explain sex and gender roles • Explain gender discrimination • Discuss effects of gender discrimination • Identify institutions that promote gender equality </td> </tr> <tr> <td>2 Threats to human rights</td> <td> <ul style="list-style-type: none"> • State factors that hinder citizens from enjoying their rights • Mention examples of human rights violations • Identify organisations protecting human rights </td> </tr> </tbody> </table>		Sub-topics	Specific Outcomes	1 Sex and gender roles	<ul style="list-style-type: none"> • Explain sex and gender roles • Explain gender discrimination • Discuss effects of gender discrimination • Identify institutions that promote gender equality 	2 Threats to human rights	<ul style="list-style-type: none"> • State factors that hinder citizens from enjoying their rights • Mention examples of human rights violations • Identify organisations protecting human rights 	SUB-TOPIC 1
Sub-topics	Specific Outcomes							
1 Sex and gender roles	<ul style="list-style-type: none"> • Explain sex and gender roles • Explain gender discrimination • Discuss effects of gender discrimination • Identify institutions that promote gender equality 							
2 Threats to human rights	<ul style="list-style-type: none"> • State factors that hinder citizens from enjoying their rights • Mention examples of human rights violations • Identify organisations protecting human rights 							
		Sex and gender roles						
<p>Starter activity</p> <ol style="list-style-type: none"> 1. Mention two duties that are performed by men/boys. 2. Do you think that only boys can do this task? 3. Mention two duties that are performed by women/girls. 4. Do you think that only girls can do this task? 		<p>Sex roles</p> <p>Someone's sex is whether they were born male or female; as a boy or a girl. Sex roles are roles that only males or only females can do because of the ways our bodies are built. For example, only women can be pregnant and only women can breastfeed babies. There are very few roles that only women or only men can perform, and all of them are related to sexual reproduction.</p> <p>Sex roles only involve sexual reproduction (creating and giving birth to babies, and breastfeeding babies).</p> <p>Gender roles</p> <p>Gender is how communities expect people to behave as females or males. So, gender roles are roles that both men and women can do, but have traditionally been done by one or the other sex.</p> <p>Gender roles are what specific communities expect men and women to do. So, these roles can be different depending on the person's culture.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content;"> <p>New words</p> <p>gender: the social and cultural differences between males and females, rather than the biological ones.</p> <p>sex: being male or female.</p> </div>

Progress in

Oxford Progress in is a learner-centred series for Grades 8–12, written by subject specialists, with a step-by-step approach that ensures full syllabus coverage. Each concept is carefully explained so that individual learners can progress at their own pace.

KEY FEATURES OF THE LEARNER'S BOOK

- A starter activity at the beginning of each topic to stimulate interest and test prior knowledge.
- Practical and written activities that can be completed with minimal resources.
- High-quality illustrations to assist understanding of the concepts.
- Revision and assessment exercises at the end of each topic.

KEY FEATURES OF THE TEACHER'S GUIDE

- A copy of the syllabus includes Learner's Book page references to show full coverage.
- Teaching guidelines and worked solutions for the activities, and for revision and assessment exercises.
- Continuous assessment guidelines.
- Graded tests and subject-specific assessment tools to assist with formal assessment.

topic 1

SUB-TOPIC 1 The simple kinetic theory of matter

The kinetic theory of matter

Matter consists of very small particles that we cannot see. Because we cannot see it with the naked eye, we use a theory to develop a model of what matter looks like and how it behaves. There are three states of matter: solid, liquid and gas. The kinetic (or particle) model of matter explains the properties of the three states of matter and describes how matter can change from one state to another.

The main points of the kinetic theory of matter are:

- Matter is composed of very tiny, discrete particles (atoms or molecules).
- Each particle of matter is in continuous random motion.
- The attractive forces between particles become stronger as the particles move closer together. The forces between similar particles within a substance are called cohesive forces. The forces between particles of different substances are called adhesive forces.
- The particles have kinetic energy because of their constant random motion.

New words

matter: anything made of atoms or molecules that are in constant random motion

theory: a set of ideas that are based on known facts and that explain something we cannot prove as fact

cohesive force: the intermolecular attractive force that acts between two particles

adhesive force: a force that acts between particles of different substances

Molecular model of matter

The arrangement and movement of particles, and the strength of their intermolecular forces, determine which physical state (solid, liquid or gas) the substance is in.

The differences between the states of matter

	Solids	Liquids	Gases
Representation of the particles			
	• spread out • take up full volume of container	• can take on shape of container • fixed volume	• fixed shape • fixed volume
Movement: The particles ...	move around freely	slide past each other, but little other movement occurs	only vibrate and rotate in a fixed position
Spaces between particles:	Very large	Small	Very small
Intermolecular forces:	Very weak	Strong	Very strong

Sub-topic 1 The simple kinetic theory of matter 3

Changes of state

<p>Melting: solid to liquid</p> <p>When a solid is heated:</p> <ul style="list-style-type: none"> • the particles gain heat energy and their kinetic energy increases; they vibrate faster and the spaces between them get larger • the forces holding the particles close together are weakened by the heat • the particles slide past each other to change positions; the solid has turned into a liquid <p>The constant temperature at which this occurs is the melting point.</p> <p>Butter melts easily on warm toast</p>	<p>Freezing (solidifying): liquid to solid</p> <p>When a liquid is cooled:</p> <ul style="list-style-type: none"> • the particles lose heat energy and their kinetic energy decreases; they move slower and the spaces between them get smaller • the forces holding the particles close together are strengthened as the heat is lost • the particles are held in fixed positions; the liquid has turned into a solid <p>The constant temperature at which this occurs is the freezing point.</p> <p>Frozen ice cream</p>
<p>Vaporization: liquid to gas</p> <p>When a liquid is heated:</p> <ul style="list-style-type: none"> • the particles gain heat energy and their kinetic energy increases; they move faster • the forces of attraction between the particles are weakened because the particles can move further away from each other • when the forces become very weak, the particles of the substance move unrestrained; the liquid has turned into a gas <p>The constant temperature at which this occurs is the boiling point.</p> <p>Salty water evaporates and leaves salt deposits behind</p>	<p>Condensation: gas to liquid</p> <p>When a gas is cooled:</p> <ul style="list-style-type: none"> • the particles lose heat energy and their kinetic energy decreases; they move slower • the forces of attraction between the particles are strengthened because the distance between the particles is smaller • the weak forces are now able to hold the particles close together; the gas has turned into a liquid <p>The constant temperature at which this occurs is the condensation point.</p> <p>Water condenses on a window on a cold day</p>

Figure 1 A summary of the four main changes of state.

SUCCESS AHEAD

Success Ahead is a series of study guides designed to help learners excel in their Grade 12 exams. The series is aligned to the Grade 12 syllabus and helps learners practise and develop core skills, helping with revision and preparation for exams.

The user-friendly study guides can be used in the classroom or for independent practice at home. They can also be used as a quick reference for challenging content. Model exam papers from 2016 with model answers written by current examiners are now included to help learners prepare and revise for exams.

They can also be used as a quick reference for challenging content.

- Practise
- Revise
- Pass
